SUMMARY

Passionate Frontend Developer with strong expertise in React.js and modern web technologies. Proven ability to create responsive, user-friendly web applications with clean, scalable code. Eager to contribute to a dynamic team and deliver high-performance solutions.

SKILLS

React JS, [JavaScript](#), Next JS, [Redux Toolkit](#), TypeScript, [HTML5](#), CSS, [Bootstrap](#), Tailwind CSS, [SQL](#), Git and Github, [Python](#), Firebase, [REST API](#), MongoDB

Interpersonal Skills: Multitasking, [Creative Problem Solving](#), Teamwork, [Time Management](#), Work Ethics

EXPERIENCE

Web Developer Intern at MCB Funds

September 2022 – October 2022

I gained invaluable experience in understanding the MVC (Model-View-Controller) structure and its application in real-world scenarios. During this internship, I had the opportunity to witness firsthand how financial transactions are managed by banks through web and mobile applications.

IT Intern at Karachi Development Authority

March 2023 – April 2023

During this internship, I had the opportunity to delve into the complexities of database management systems and witnessed firsthand how a government organization efficiently manages city property details through systematic database management.

EDUCATION

BE in Computer Information Systems Engineering

October 2020 – August 2024

NED University of Engineering and Technology • 2024 • 3.564 CGPA

PERSONAL PROJECTS

Portfolio – This portfolio is a responsive React application, featuring Framer Motion animations and Tailwind CSS styling. It showcases a modern, gradient design with sections for projects, skills, and experience. [Live Link](#)

Fithub – Developed an eCommerce fitness store website using React with useContext and useReducer for state management, including cart functionality and automatic total calculation. Integrated Firebase for authentication [Live Link](#)

FoodOrder – A mobile-responsive food ordering app built using React.js, Tailwind CSS, and Redux Toolkit, search and filtering functionality for a seamless user experience. Designed to work efficiently across devices. [Live Link](#)

ReduxStore – E-commerce application that uses Redux Toolkit and createAsyncThunk to manage state and handle asynchronous API calls for fetching products, allowing users to add items to their shopping cart and manage the cart's contents. [Live link](#)

MovieLand – Developed a React-based movie project that fetches and displays movie data using Axios to make GET requests to an API. [Live link](#)

Personal Website – Developed a personal website to showcase my skills and projects using React JS and Tailwind CSS. This site highlights my expertise in front-end development and responsive design. [Live link](#)

Lensmart – Build a beginner React user interface project to learn react hooks and understand single-page routing. [Live link](#)
