SUMMARY

I'm looking for opportunities to work as the Front End Developer or React Developer for a reputable company in order to advance my technical abilities.

EXPERIENCE

Web Developer Intern at MCB Funds

September 2022 – October 2022

I gained invaluable experience in understanding the MVC (Model-View-Controller) structure and its application in real-world scenarios. During this internship, I had the opportunity to witness firsthand how financial transactions are managed by banks through web and mobile applications.

IT Intern at Karachi Development Authority

March 2023 – April 2023

During this internship, I had the opportunity to delve into the complexities of database management systems and witnessed firsthand how a government organization efficiently manages city property details through systematic database management.

EDUCATION

BE in Computer Information Systems Engineering

NED University of Engineering and Technology • 2024 • 3.564 CGPA

October 2020 – August 2024

Intermediate

Adamjee Government Science College Karachi • 2020 • 89.91%

July 2018 – May 2020

PERSONAL PROJECTS

Portfolio – This portfolio is a responsive React application, featuring Framer Motion animations and Tailwind CSS styling. It showcases a modern, gradient design with sections for projects, skills, and experience. [Live Link](#)

ReduxStore – E-commerce application that uses Redux Toolkit and createAsyncThunk to manage state and handle asynchronous API calls for fetching products, allowing users to add items to their shopping cart and manage the cart's contents. [Live link](#)

Fithub – Developed an eCommerce fitness store website using React with useContext and useReducer for state management, including cart functionality and automatic total calculation. Integrated Firebase for authentication [Live Link](#)

MovieLand – Developed a React-based movie project that fetches and displays movie data using Axios to make GET requests to an API. [Live link](#)

ContactBook – Created a React contact adder website that allows users to add and view contacts, with data stored in local storage for persistence. [Live link](#)

Personal Website – Developed a personal website to showcase my skills and projects using React JS and Tailwind CSS. This site highlights my expertise in front-end development and responsive design. [Live link](#)

ReduxTodoList – Created a to-do list application using Redux Toolkit to learn and demonstrate how Redux works, like creating slices and managing the store and efficient handling of actions and reducers in a React application [Live link](#)

Lensmart – Build a beginner React user interface project to learn react hooks and understand single-page routing. [Live link](#)
