SUMMARY

I'm looking for opportunities to work as the Front End Developer for a reputable company in order to advance my technical abilities.

EXPERIENCE

Web Developer Intern at MCB Funds
September 2022 – October 2022

I gained invaluable experience in understanding the MVC (Model-View-Controller) structure and its application in real-world scenarios. During this internship, I had the opportunity to witness firsthand how financial transactions are managed by banks through web and mobile applications.

IT Intern at Karachi Development Authority
March 2023 – April 2023

During this internship, I had the opportunity to delve into the complexities of database management systems and witnessed firsthand how a government organization efficiently manages city property details through systematic database management.

EDUCATION

BE in Computer Information Systems Engineering
October 2020 – August 2024

NED University of Engineering and Technology• 2024 • 3.567CGPA

PERSONAL PROJECTS

Portfolio – I developed a personal website to showcase my skills and projects using React JS and Tailwind CSS. This site highlights my expertise in front-end development and responsive design. **Live link**

Fithub – I created an eCommerce fitness store website using React, leveraging useContext and useReducer for state management. Here we can add products in cart and total amount will be calculated for added products. **Live Link**

MovieLand – I developed a React-based movie project that fetches and displays movie data using Axios to make GET requests to an API. **Live link**

ContactBook – I created a React contact adder website that allows users to add and view contacts, with data stored in local storage for persistence. **Live link**

ReduxTodolist – I Created a to-do list application using Redux Toolkit to learn and demonstrate how Redux works, like creating slices and managing the store and efficient handling of actions and reducers in a React application **Live link**

Lensmart – I build a beginner React user interface project to learn hooks and understand single-page routing. **Live link**
